ABOUT

Data Scientist with expertise in translating complex data into actionable insights through advanced statistical analysis, machine learning, and data manipulation. Adept at solving real-world business problems across Banking, Retail Media, and Customer Analytics to drive strategic decision-making and operational improvements.

AREAS OF INTEREST

- Statistical Analysis
- Machine Learning
- Generative AI
- Optimization
- Visualization

WORK EXPERIENCE

Dun & Bradstreet – Senior Data Scientist

Chennai | Oct 2024 – Current

Credit Fintech | Predictive Analytics

- Developed and maintained machine learning models to predict borrower credit scores based on repayment behaviour, in alignment with credit bureau requirements.
- Led model recalibration and performance monitoring, implementing drift detection and threshold adjustment strategies.
- Investigated and resolved JIRA tickets raised by internal banking teams regarding score anomalies. Performed root cause analysis at the borrower level and provided actionable solutions based on the person repayment behaviour.
- Created an Exploratory Data Analysis, covering variable trends, parent-child numeric relationships, and count-based health checks to support server migration validation.
- Planned a synthetic data generation module to simulate macroeconomic stress conditions, enabling future-ready model testing and risk scenario planning.
- Exploring Generative AI to enhance score explainability, providing borrower-level narrative justifications based on model features and decision logic.

MathCo – Data Scientist

Bangalore | Nov 2021 – Oct 2024

An American Home improvement retail corporation

Ad-hoc analysis | MMM -Retail Media

- Designed and automated a data pipeline using **Vertex AI Pipelines** to extract data from BigQuery via SQL, transform it using pandas Data Frames, and load the final results back into BigQuery. The processed data powered Tableau dashboards that analyzed campaign budget utilization and key performance indicators (KPIs) across multiple sources.

An American Multinational Fortune 1 retail company

Ad-hoc analysis | Customer segmentation | Visualization | Retail & Ecommerce.

- **Responded swiftly to ad hoc tasks**, providing timely data insights and support to facilitate informed business decisions using Google Cloud Platform (GCP).
- **Assessed client performance against competitors** by leveraging third-party transactional data to identify market positioning and opportunities.
- **Applied machine learning techniques** to analyze customer behavior and address key business questions regarding behavioral changes. (**Marketing Analytics**)
- **Developed and maintained Looker dashboards** to visualize KPI metrics, enabling clearer insights and enhanced decision-making.

SANMINA – Test Engineer

Original Electronics Manufacturing Company (OEM)

Chennai | Oct 2018 – Feb 2021

Excel reporting | Documentation expert for data-driven insights

- **Managed Back-End Testing processes**, focusing on quality assurance to deliver defect-free products to clients, while overseeing inventory management for various projects. (Ather Ev bikes, Philips Ultrasound)

- **Created and maintained incoming tester documentation** and **generated detailed inventory reports** using Excel to streamline project tracking and resource allocation.

EDUCATION

Great Lakes Institute of Management, Chennai Generative AI for Natural Language Processing Program	Jan 2024 — May 2024
Great Lakes Institute of Management, Chennai PG Diploma in Data science and Engineering Percentage: 84	Mar 2021 — Sept 2021
St. Joseph's Institute of Technology, OMR, Chennai Bachelors of Engineering - Electrical & Electronics Engineering Percentage: 77	Jun 2018
Sunbeam Matriculation Higher Secondary School, Vellore High school Percentage: 94	Feb 2014
Vani Vidyalaya Matriculation Higher Secondary School, Vellore Middle school Percentage: 89	Mar 2012

SKILL SET

- Programming Languages
 - Python, SQL
- Cloud
 - GCP (Google Big Query).
- Database
 - Oracle, MSSQL
- DevOps
 - Git, JIRA
- Data Visualization
 - Looker, Tableau, Power BI
- Modelling expertise
 - Regression, Classification, Clustering.
